

Sovereign Sentinel - Week 3 Final Production Architecture

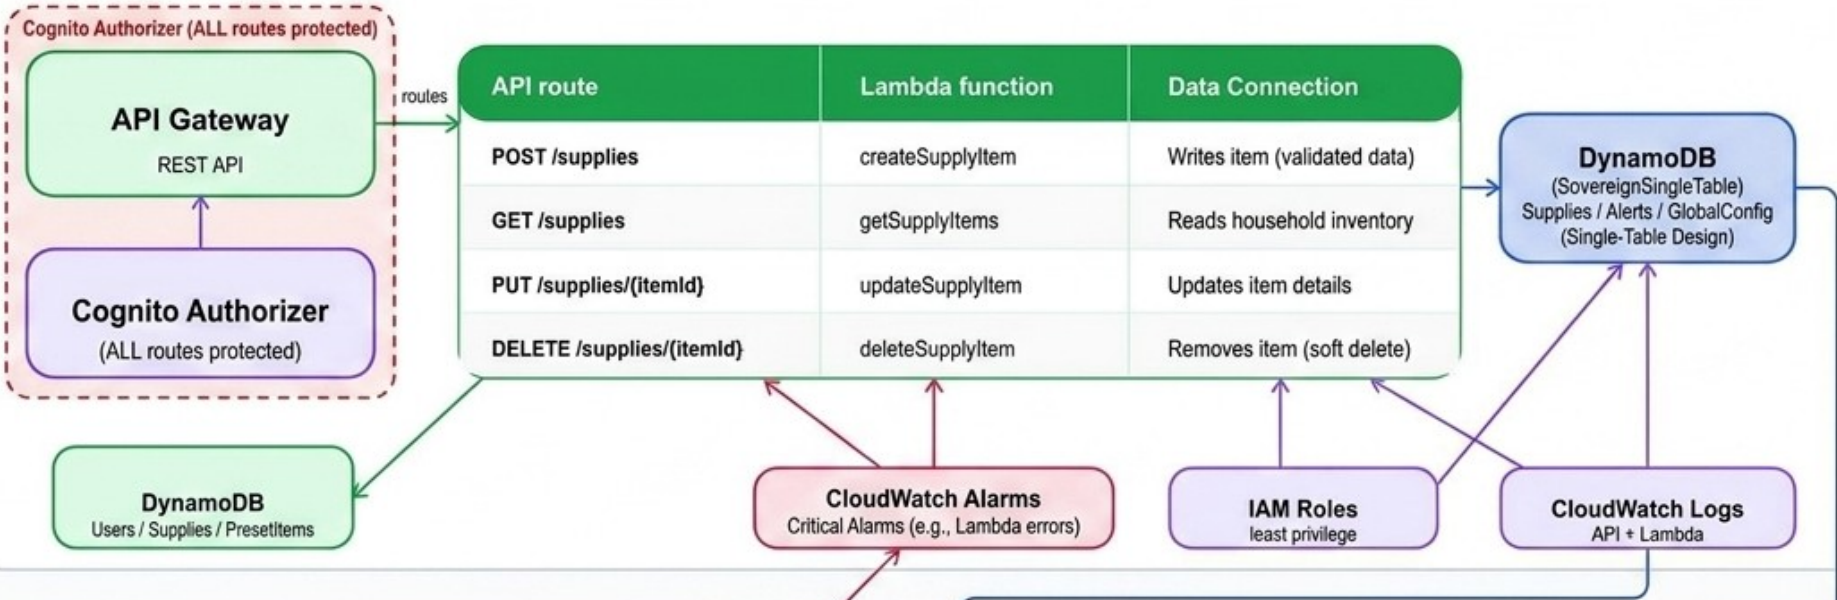

Route-level reference diagram for the React frontend, API Gateway endpoints, Lambda functions, DynamoDB tables, alerts, and logs.

1. Authenticated frontend and content delivery

Note: S3 is private and accessed only via CloudFront Origin Access Control. All frontend calls to the API include the Cognito JWT token.

2. Secured API Gateway routes and Lambda services

3. Production expiration alert workflow

Rule: check for supplies expiring in 14 days and send direct, formatted email notifications.
